An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stuart Auvinen, Patent Agent on 16 February 2007.

**Examiner's Amendment**

**In the Claims:**

Claims 16-23 have been cancelled.

The Title have been amended to – Method of Making a Surface Mountable PCB Module--

**Office's Reasons for an Allowance**

COMES NOW the Patent Office and offers a reason for the allowance of the Application to wit: that the Prior Art neither teaches or in any reasonable combination, suggest a manufacturing process for making a mountable printed circuit board (PcB) module including the steps of etching inner metal layers on both sides of an insulating core to form patterned interconnect on the inner metal layers, laminating a component metal sheet and a component insulating layer over one of the inner metal layers, laminating a pad metal sheet and a sacrificial insulating layer over another one over another one of the inner metal layers, etching the component metal sheet to form patterned component layer interconnect from the component metal sheet, etching pad metal layer of the pad metal sheet to form solder pads from the pad metal sheet, drilling castellation vias on

the pad metal layer, and forming metal inside the castellation vias that connect the pad metal layer to the patterned component layer interconnect or the patterned interconnect on the inner metal layers, milling a cavity into the sacrificial insulator layer, the cavity not reaching the patterned interconnect on the inner metal layers and wherein the sacrificial layer covered by the solder pads forms a plurality of stand-offs after milling, whereby the solder pads on the stand-offs are surface-mountable to a main board.
